Weekend Report from R8

North Dakota Delegation Call -- Cynthia reported already on this call regarding VOC emissions from oil and gas in ND in her weekly. It is worth noting that all ND delegation members and Gov Dalrymple were on the letter and the 45 minute call with Cynthia and me, demonstrating their strong interest in the issue. As Cynthia noted, conversations since the call have progressed in a positive way, and I am encouraged at this point that we will be able to find agreement with the State on a coordinated approach moving forward. This week, Deb Thomas will be meeting with the ND Petroleum Council on my behalf, during which these issues will also likely be raised.

Uintah & Ouray Reservation FIP -- Our air program has been requested by OMB to brief them before Jan. 22 on the draft proposed rulemaking to achieve VOC emission reductions at existing oil and gas sources located in Indian country on the U&O Reservation. We are coordinating closely with Janet and OAR, as well OGC, on the proposed FIP. Last week, we had a consultation with the Tribe on the proposed FIP.
